

- Available in rechargeable & non-rechargeable models
- LED battery indicator
- Enough audio power to support two divers
- Molded co-polymer case with O-ring seal for protection
- External 12VDC power connection
- Independent diver and tender controls
- All connections on side of case for remote operation with lid closed
- Black powder coated panel with easy to read white graphics
- Flip-latch battery compartment with O-ring seal
- Remote Walk & Talk belt module (optional)
- Tape Record Jack is standard
- 2 and/or 4 wire operation standard

**HYTECH TECH NOTE**

All communicators will transfer all top-side noise to the divers when using the radio speaker only. To eliminate background noise and achieve clear concise communications, use a push to talk microphone/headset, or a remote walk & talk with headset

The Amcom™ I is a small compact one diver radio packed with 22 watts audio power and many versatile features to give you many years of service. The Amcom I is available in a rechargeable version (2810A) complete with the new and improved Amron 2823-602 External Charger with Gel-cell battery or a non-rechargeable version (2810A-1) with standard lantern type batteries. Small enough to fit in your gear bag and priced to fit your budget. No diver should be without an Amcom I for backup or primary communications!
