

MK7 BuddyLine

The MK7 BuddyLine is a compact, self-contained one- or two-diver air intercom. It will allow clear communications in the 4-wire mode (round robin). The MK7 BuddyLine was specifically designed for Search & Rescue Teams to have an underwater communication device that had little set-up time.

The 2 watts of power is managed by state-of-the-art circuitry allowing relatively long life and great intelligibility. MK7 BuddyLine operates on 8 AA Alkaline batteries. An optional rechargeable battery pack and battery charger is available. MK7 BuddyLine and our ComRope is a great package and will ensure a dive operation runs smoothly.

MK7-BuddyLine (900104-000) Specifications:

Battery Life: 12 hours continuous use.

Frequency Response: 600 to 10,000 Hz.

Output Power: 2 watts.
