

*70 MSW (230FSW) precision gauge*

3D pneumo gauges are available in various dial sizes, case configurations and pressure ranges.

There are three case configurations: Front, back or no flange. The connection can be in the bottom or in the back of the gauge. The connection is either 1/4" or a 1/2" NPT.

There are five different dial sizes available:

- 2.5" (63.5 mm)
- 4.5" (114.5 mm)
- 6" (152.5 mm)
- 8.5" (216 mm)
- 12" (305 mm)

Various dual scale pressure ranges are available, for example:

- 20 MSW (70 FSW)
- 40 MSW (140 FSW)
- 70 MSW (230 FSW)
- 90 MSW (300 FSW)
- Etc...(up to 700MSW/2300FSW)

Features:

- Helical Wound Bourdon Tube
- All wetted parts in 316SS or Inconel
- Needle edged pointer
- Great reading accuracy
- Corrosion resistant
- Maintenance free
- Long service life.

All 3D precision gauges come with calibration certificates.
