

In the often oxygen enriched environments of hyperbaric systems flammable materials pose an enormous threat.

Fire inside a chamber must be prevented at all times.

Hytech stocks several sorts of textiles, clothing and bedding for use inside decompression chambers or other hyperbaric systems.

Blankets, quilts, sheets, pillows, mattresses and mattress covers, robes and overalls. These fabrics were developed to provide maximum fire protection coupled with good overall textile properties.

These fabrics have found widespread acceptance in a variety of hazardous environments.

Features:

- Highly resistant to ignition.
- Resistant to burning in oxygen enriched environments.
- Resistant to shrinkage in flames.
- Heat resistant.
- Good hand and drape.
- Comfortable.
