

The Hytech HT-GF Helmet light is available in a 30W or 50W version. It can be mounted on Kirby Morgan helmets and band masks. The lamp can be used up to 140 meters of depth. The lamp head is made of anodized aluminum, and the mounting bracket is made of Stainless Steel.

There is a triple O-ring seal between the lamp head and the housing. Changing the light bulb is very easy: simply unscrew the lamp head, and the lamp fitting can be pulled out.

The picture shows the helmet light mounted on a band mask. A compact helmet camera is mounted on the other side of the mask.

Technical Specifications	
Voltage	12V
Current:	2.5 A 4.2 A
Power:	30W 50W
Beam width:	24°
Colour Temperature:	3800 K
Bulb Life	100 hours
Diameter	55mm
Length	178mm
Height:	80mm
Max. Depth:	140 msw
