

“Allows for quick and easy conversion of the Dive-Ranger Interrogator (DRI-267)) for relocating transponders from the surface.”

- \* User friendly deck box
- \* Shows range & bearing to transponders
- \* Includes deck box, carrying case, cable & staff
- \* Quickly converts from diver mode
- \* Track up to 7 different transponders

The ACU-266 Surface Conversion Kit is a valuable addition to the DRI-267 Dive-Ranger Interrogator. The ACU-266 now allows the operator the ease of relocating and tracking up to 7 different transponders from the surface.

The rugged aluminium staff assembly, secure harness, and easy to read LCD display enhances the DRI-267 system at a surprisingly affordable price. Best of all, the ACU-266 easily converts to and from the diver mode. There is no complicated set up or calibration involved-just attach the cable to the DRI-267, and turn the ACU-266 on- its that simple!

Compack Deck Box
