

The Dive-Scan by Vexilar makes a great addition to your diving bag. This rugged, reliable, and very affordable personal sonar lets you accomplish a variety of tasks with a simple push of the button.

Need to check the water depth before going in? Hold the Dive-Scan underwater, point at the bottom, and push the button.

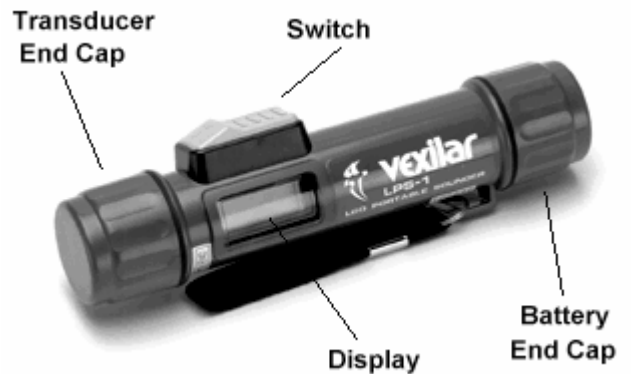

When you release the button the sonar will hold your last reading for 10 seconds so that you can comfortably look at it. While diving, you may want to know how much further down the bottom is from where you are, simply push the button and check!

This compact personal sonar is extremely reliable and so easy to use! It features an automatic shut-off so that you don't have to worry about draining your battery.

Whether you want to measure the distance or check the water depth, you can be sure that this personal sonar will come in handy dive after dive.

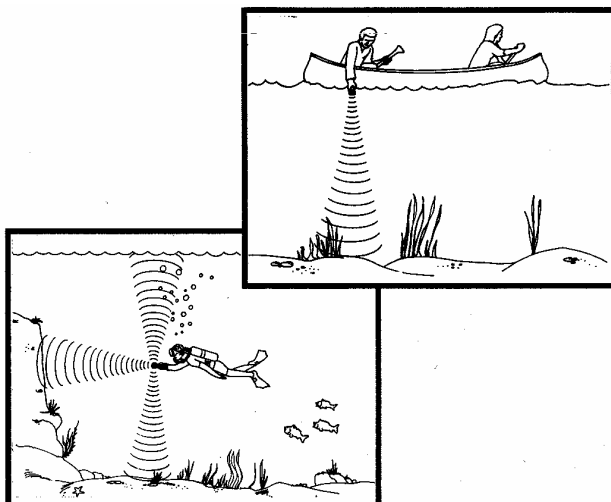

Better yet, the Dive-Scan comes standard with a 1-year warranty backed by a company which has been supplying high-tech diving products to commercial and military divers for over 15 years.

- Check water depth
- Check distance to underwater objects
- Scan area ahead of you for obstacles
- Ideal for use in inflatables or kayaks
